JUS-130 *	Create schedule document	✓ Task	Medium	DONE	-

Issues Removed From Sprint

View in Issue navigator

Key	Summary	Issue Type	Priority	Status	Story Points (80)
JUS-8	As a customer, I want to be able to place a bid on an event, so that I can be eligible to win the auction.	📌 Story	🔴 Highest	TO DO	20
JUS-24	As an event organizer, I want to be able to create a new event, so that the customers can see my event and its relevant information.	📌 Story	🔴 Highest	TO DO	40
JUS-115	As an event organizer, I want to be able to access a dashboard that lets me manipulate my events, so that I can manage my events more easily.	📌 Story	🔴 Highest	TO DO	20

The velocity of this sprint is very pushed towards the end. This is because of midterms and assignments and the overall structure of tickets. Every ticket is composed of quite a few sub-tickets so stories were only really completed at the end.

The velocity for sprint 3 is a bit worse than sprint 2. But again this is because of midterms and the availability of all team members with exams and assignments.

The reasons for removing stories has been added to schedule.pdf as said in the handout
